EXPERIENCE

Enterprise Architect Specialist

May 2021 - Present

KPMG | Baltimore, MD

- Delivered end-to-end solution content that characterized what products or services were being proposed and how these services would be delivered, resulting in a \$1.2M increase in annual revenue.
- Applying UI/UX design expertise to create wireframe mock-ups, business use cases, and DODAF architecture views, using current industry standards and best practices, to enhance the user experience and align with business goals.
- Collaborating with scrum masters, product owners and project managers to create wireframe mock-ups, business use cases and DODAF architecture views needed to enhance an entire line of business within a single enterprise.
- Engaging with clients, to understand their needs and designing visually appealing and user-friendly dashboards using Figma, a popular UI/UX design tool, to provide actionable insights and enhance user experience.

Enterprise Architect Consultant

Dec 2019 - May 2021

Grant Thornton LLP | Rosslyn, VA

- Collaborated with key stakeholders to define enterprise architecture principles, standards and guidelines, and blueprints.
- Consistently used business process modeling techniques to assess current state and define future state processes using MS Visio and DOD Architecture Framework.
- Successfully translated high-level requirements into technical designs that can be implemented by the engineering team.
- Utilized Visio BPMN tools to reform 45+ business processes within a single organization to enhance day-to-day operations successfully from current state to future state.

Systems Engineering Analyst

June 2018 - Dec 2019

Grant Thornton LLP | Rosslyn, VA

- Constructed and designed a segment capability model which generated dozens of business process models and UX-based scenario models to support the development of a newly refined lines of business.
- Briefed solutions for a major database decommissioning effort to executive leaders and obtained approvals on all suggested paths forward.
- Lead a team of architects to build an architectural roadmap to include Virtualization, Cloud Services features and server/storage optimization strategies.
- Gathered business requirements for system enhancements by conducting detailed interviews with business users, stakeholders and Subject Matter Experts (SMEs).

IT Business Analyst

Aug 2017 - June 2018

Accenture | Rosslyn, VA

- Managed user permissions for Atlassian tools, configuring and maintaining multiple Jira projects, workflows, schemes, settings, users, and reports in the latest JIRA environment.
- Implemented best practices for configuring and administering Enterprise Instances of Jira and Confluence, balancing the needs of multiple tenants while minimizing administration overhead.
- Collaborated with Scrum teams to define requirements, design solutions, and test implementations, demonstrating a strong ability to work cross-functionally.

Application Development Analyst

May 2016 - August 2017

Accenture | Rosslyn, VA

- Contributed to the development of standards and best practices for knowledge management techniques and applications.
- Coordinated with multiple programs to ensure collaboration and guidance on knowledge management best practices.
- Work with system testers to resolve issues found, whether through unit testing, functional testing, 508 testing, or through system penetration testing understanding the business problem statement, user scenarios, and technical constraints.
